SPECIAL INSTRUCTIONS FOR OWNER

- Complete isolation from healthy herd in quarantine shed with dedicated biosecure footbath.
- Maintain continuous access to lukewarm clean drinking water with electrolyte supplementation.
- Provide soft steamed gruel and succulent green fodder; avoid coarse fibrous dry straw.
- Clean udder with lukewarm antiseptic wash before and after each milking session.
- Record rectal temperature twice daily (morning 07:00 AM, evening 06:00 PM) in patient chart.

FOLLOW-UP CARE PLAN
